BLOCKCHAIN TECHNOLOGY INNOVATION GROUP

BBACHAIN
ROADMAPS

Roadmaps are a visual and general summary, direction, and strategic planning of BTI GROUP. Roadmaps are also a bridge to connect global investors and the development team.

Roadmaps help our vision as well as coherence, and continuity, throughout our development. The events listed in Roadmaps are big and strategic events of BTI GROUP.

Roadmap timelines are approximate and tentative. Our team recommends events on Roadmaps quarterly and annually based on actual market fluctuations so we can innovate, be adaptive, and be perpetual.

20
21

Established BTI GROUP (Blockchain Technology Innovation Group). In the Estonian capital Tallinn.

Completing the company apparatus (BTI GROUP). Research the cryptocurrency market and the development trends of blockchain technology platforms in the future.

Establishing an intensive research and development team on blockchain technology and advanced applications on the blockchain platform.

Research and develop BBACHAIN network successfully.
With outstanding features such as high security, network scalability, and stability, faster transaction speed, consumes less energy, low transaction fees of almost zero, and transactions per second of up to 100,000. BBACHAIN is the number one solution in digital technology, helping grow up the cryptocurrency, and suitable for a wide range of users in many different fields.

20
22

Bringing ideas and practical development BBACHAIN Whitepaper. Developing and working to complete the BBACHAIN network.

Research, and develop BBA Wallet which integrates Web3 browser, allows users to interact with decentralized applications, supports NFTs management, minimalist logic, and design makes it easier to use.
BBA Wallet allows users to choose the length of an entropy sequence of 128 to 256 bits equivalent to 12, 15, 18, 21, and 24 recovery phrases (mnemonic). BBA Wallet integrates and supports more different blockchains on a single platform.

BBA Wallet release testing (Alpha) version on Google Play Store and Apple App Store.

Research and development BBA Scan supporting explore blocks and transactions on BBACHAIN. Bring transparency and clearly information to end-users and developers of BBACHAIN. End-users can find transparent information on the blockchain network such as wallet address, address balance, transaction history, transaction fees, and more.

20 23 Quarter I and II

- Launch, develop, and complete testnet of BBACHAIN.

- BBA Wallet beta test only supports testnet of BBACHAIN.

- BBA Scan beta test only supports testnet of BBACHAIN.

- Quick Token Generator tool research and development help developers create tokens on the BBACHAIN network quickly without any programming expertise. Tokens can be created instantly with an estimated success cost of just under $1.

- Research and development BTI Swap, is a decentralized exchange operating on BBACHAIN. BTI Swap is safe and secure, allowing end-users to make transactions in the BBACHAIN ecosystem without going through any intermediary organizations. All transactions are done directly on the blockchain with low slippage.

Research and development BTI Prices Center, a center of cryptocurrency data statistics. Allows end-users to look up important information about cryptocurrencies such as prices, price charts, market capitalization, and trading volume, monitor market movements, learn about new projects, market analysis tools, and more.

20
23 Quarter III and IV

Launch BBA Scan production supports main-net and test-net of BBACHAIN.

Launch BBA Wallet production supports main-net and test-net of BBACHAIN.

Release the stable version (production) of BBA Wallet on Google Play Store.

Establishing multi-channel communication, spreading the BBACHAIN technology platform to individuals, communities, and blockchain organizations around the world. At the same time, the media strongly promoted the launch event of BBACHAIN technology platform (GENESIS BLOCK LAUNCHING) in Budapest - Hungarian.

Launching the mainnet, the first block "GENESIS BLOCK" was created marking the beginning and breakthrough of BBACHAIN technology platform and BBA.

Organized event of BBACHAIN technology platform (GENESIS BLOCK LAUNCHING) in Budapest – Hungary.

Setting up the Cloud Validators Cluster - Cloud Validators Pool. Sharing BBACHAIN technology with the worldwide community, helping the global community participate in the Cloud Validators Pool and own the BBA.

Release the stable version (production) of BBA Wallet on the Apple App Store.

Research, integrate, and test BBACHAIN into Offline Wallet. Helps users effectively prevent unauthorized intrusion and avoid attacks caused by hackers, helping to increase safety for BBA holders.

Research and development of BTI NFT Marketplace. Enable end-users to create their favorites and collect collections, items for sale, exchange and trade their NFT assets on the BTI NFT Marketplace. NFT Market is a segment in the cryptocurrency market designed to trade non-fungible assets in the form of Tokens (NFTs).

Research and development exchanges BTI Exchange, where investors, holders, and traders do activities like Buy and Sell their digital assets. With criteria such as security, encryption of user information and data, fast transaction processing speed, friendly user interface, variety of currency pairs, and attentive and dedicated customer support.

Recruiting and training high-quality human resources globally, serving the BTI GROUP's long-term and sustainable development strategy.

Promoting marketing campaigns on social networking platforms, helping organizations and businesses to digitally transform on BBACHAIN.

Open representative offices across continents and support open offices in countries that accept and strongly develop BBACHAIN technology platform.

20 24 Quarter I and II

- Launch the BTI Exchange beta version and integrate more new technology platforms.

- Launch of Quick Token Generator Beta version rapid token generation tool.

- Decentralized exchanges beta version launch BTI Swap.

- Decentralized exchanges beta version launch BTI Prices Center.

- Research and development of payment system BBA Pay Adapter. Integrate BBA in payment cards, issue payment cards, and link with partners globally. End-users who have BBA in their Wallet can buy goods at e-commerce sites, stores, and shopping malls. However, this payment card will not be compatible with some countries and local laws. Users need to comply with applicable laws in their country.

Stable coin research and development BTI Stablecoin EUB.
EUB is a digital currency developed on BBACHAIN and has a stable value, the value of EUB is pegged to the price of EURO; 1EUB=1EURO. EUB as a means of payment and transaction in the ecosystem of BTI GROUP. At the same time, the EUB is a safe haven whenever the market has strong fluctuations.

Decentralized exchanges beta version launch BTI NFT Marketplace.

Develop Chrome/Firefox Extension of BBA Wallet running on a Web browser.

Open more offices, support opening offices in accepting countries, and strongly develop BBACHAIN network and ecosystems of BTI GROUP.

Promote marketing campaigns on social networking platforms around the world.

20
24 Quarter III and IV

Start the official development of the Quick Token Generator tool, which will help end-users create tokens on the BBACHAIN network with an estimated cost of less than $1.

Start the development of the BTI Prices Center, which will later move into official operation. Create Big Airdrops programs, throughout the cryptocurrency market to promote, and attract users to know, and use utility platforms, and ecosystems of BTI GROUP

Reviewing an overview of the actual needs of the entire market, in order to make objective and accurate judgments and assessments of the necessary elements of the market. Will consider listing BBA on exchanges and CoinMarketCap

Begin strategic groundwork for BTI Exchange and BTI Swap integration.
Initial planning and architecture design are underway for BTI Exchange and BTI Swap, ensuring seamless interoperability and scalability. The technical framework is being developed to support smooth user transitions between centralized and decentralized environments, enhancing the overall utility and flexibility of the BBACHAIN ecosystem.

Conduct internal testing and technical audits for the BBA Wallet infrastructure.
Efforts have been initiated to test and strengthen the existing BBA Wallet, focusing on usability, security, and scalability. This phase includes early compatibility testing with the upcoming BBA Pay Adapter and BTI Token utilities to ensure future integration flows smoothly.

Launch developer engagement and onboarding campaigns. To foster early engagement, BTI GROUP has started preliminary outreach to developers interested in building within the BBACHAIN ecosystem. These efforts include the preparation of documentation, SDKs, and incentive structures that will be part of the broader development and tokenization initiatives planned for 2025.

20 25 Quarter I and II

Start the development of the BTI Exchange cryptocurrency exchange. BBA will officially become the base currency pair of BTI Exchange, and will be priced and converted to all other coins on the platform once operational.

Continue fundraising efforts and research to identify the actual needs of the market and potential projects suitable for development on the BBACHAIN technology platform. Discussions with several projects are underway, aiming to establish the BTI Investment Funds. The goal is to attract capital from large investment funds and support selected projects with funding, knowledge, and experience across the BTI GROUP ecosystem.

Promote communication and create marketing campaigns on social networking platforms around the world.

Strengthen linkages with major partners in the field of technology application and expand market share in the field of cryptocurrencies and exchanges.

Start the development of the decentralized exchange platform BTI Swap. This platform will enable users to seamlessly swap tokens within the BBACHAIN ecosystem, providing fast, secure, and low-cost decentralized trading. BTI Swap is a key component of the BBACHAIN ecosystem and will serve as a foundational tool for token utility and user engagement.

BTI Wallet (Extension version) is being upgraded continuously every day to suit actual needs and the BTI Wallet (mobile version) will continue to be upgraded based on the Extension codebase.

20 25 Quarter III and IV

The Quick Token Generator (the main mission from token creation) changed its name to BTI Token (supporting Token and NFT-related utilities on the BBAChain platform). Now fully operational, BTI Token provides users with a streamlined interface to create, manage, and deploy custom tokens and NFTs on the BBACHAIN network. With an emphasis on accessibility and low-cost deployment, the platform simplifies the tokenization process for both individuals and businesses, enhancing utility across the ecosystem.

BTI Swap is now fully operational and running seamlessly within the BBACHAIN ecosystem. It provides users with fast, secure, and cost-effective decentralized trading experiences. Built to serve the growing demand for native token utility and liquidity, BTI Swap ensures smooth and efficient token swaps exclusively on the BBACHAIN network.

BTI Swap will un-support multi-network (BBA, BSC, ETH and SOL) to just BBAChain support,
integrated directly into the BTI Token DApp (combining BBAChain Liquidity, BBAChain Swap and BTI Token utility features). This strategic shift streamlines the platform's performance, enhances user experience, and reinforces the BBA ecosystem as the core environment for all token-related functionalities.

Testing and piloting the payment system BBA Pay Adapter, connecting payment cards to BTI Wallet, towards issuing payment cards and linking with global partners.

Initial and launch BTI Stablecoin EUB on the BBACHAIN testnet. EUB is a digital currency developed on the network of BBACHAIN, as a means of payment and transaction in the ecosystem of BTI GROUP.

Start the development of the official BTI NFT Marketplace, which allows content creators to price and sell their NFT collections.

Strengthen linkages with major partners in the field of technology application and expand market share in the field of cryptocurrencies and exchanges.

Provide documentation, guidance, and support for shareholders and strategic investors of the company to set up and operate Validator Nodes themselves.

Support businesses and users to generate tokens quickly and run separately on BBACHAIN. In order to support and promote businesses to digitise and integrate with the world.

20 26

BBA Wallet allows owners to contribute BBA for staking on the wallet, to earn rewards, and to help stabilise and improve the security of BBACHAIN.

Develop and officially put into operation the payment system BBA Pay Adapter. Cryptocurrency users who have BBA in their wallets can buy goods and services at e-commerce sites, stores, and commercial centres. Support BBA for frameworks such as Laravel, WordPress, NestJS, game utils, e-commerce, etc.

Support listing new coins on the BTI Exchange and listing on the BTI Prices Center, cryptocurrency data statistics centre.

Support to list potential coins develop on BBACHAIN into BTI Exchange. At the same time, listed on the BTI Prices Center cryptocurrency data statistics center.

Develop, connect, and integrate BBA to Offline Wallet.
BBA will be integrated into Offline wallets like Ledger or Trezor to increase safety for BBA hold-ers. Offline Wallet is isolated from the internet and contains chips and layers of high security. Development and official operation of the decentralized exchange BTI Swap.

Integrate the exchange system BTI Swap, BTI NFT Marketplace into the BTI Exchange cryptocurrency exchange. In order to enhance user convenience and usability, increase the extensibility of BTI Exchange. All user needs are on a single BTI Exchange account.

Initial and launch BTI Stablecoin EUB on the BBACHAIN mainnet. EUB is a digital currency developed on BACHAIN and has a stable value, the value of EUB is pegged to the price of EUR; 1EUB-1EURO. EUB as a means of payment and transaction in the ecosystem of BTI GROUP. At the same time, the EUB is a safe haven whenever the market has strong fluctuations.

BTI Investment Funds will support capital and directly raise capital for startups on BBACHAIN, and support communication to the community of BTI GROUP. Mentoring and providing solutions for startups that are always on the right track for sustainable and successful develop-ment.

Building and establishing strategic partners globally in the field of blockchain technology and ancillary products in the cryptocurrency industry.

Improve technology and expand user utilities on ecosystem platforms. Especially always updat-ing, improving, and innovating technology on all platforms of BTI GROUP.

Open offices, support opening offices in accepting countries and strongly develop the BBACHAIN network and ecosystems of BTI GROUP. Promote communication and create marketing campaigns on social networking platforms around the world.

FROM 20 27 onwards

Constantly developing, regularly improving, and updating new technologies, enhancing features and performance for technology products, and developing and expanding the ecosystem of BTI GROUP.

Building and strongly developing new ideas to serve the ecosystem of BTI GROUP, in order to increase the value of the BBA.

Promote and make BTI Exchange the largest, most popular cryptocurrency exchange, with the largest number of users and trading volume. Bringing BTI Exchange to the top of the world's most secure and convenient cryptocurrency exchanges.

Promote and make BBA the most popular coin in the crypto market: listed at the top on the crypto statistics page.

Promoting and growing, the BBACHAIN network to become the most commonly used blockchain in the digital industry.

Developing, covering the "Customer Support" office globally. Focus on training regular and professional human resources in order to bring customers and users the best, most advanced, most secure, and friendly service, and technology experiences.

BTI GROUP strives to be a pioneering technology corporation, always leading in the field of digital technology and blockchain technology.
