

# PITCH DECK

● BBACHAIN by BTI Group OÜ

# ELEVATOR PITCH

- Imagine a Layer 1 blockchain that's not just another platform but a complete ecosystem designed for community growth and innovation.
- BBACHain is revolutionizing how we think about blockchain technology by introducing a Revenue Sharing program that rewards its community directly. But that's not all.
- We're also setting our sights on leveraging this decentralized system to transform national elections, making them faster, more transparent, and utterly tamper-proof.
- Join us in shaping a future where technology empowers democracy and community success is shared success.

# THE PROBLEM

- Blockchain solutions currently face limitations in their ability to scale, as seen with Bitcoin, exhibit high fees, as with Ethereum, or encounter performance issues, like Solana and others.
- Despite these challenges and limitations, it's possible to find some decent projects and blockchain solutions.
- However, from an investor's perspective, the competition is intensifying, and all of them lack proper incentives for serious investors.

# MANY LAYER 1 BLOCKCHAINS

# WHICH ONE IS THE BEST TO INVEST

- Determining the **best investment** in the cryptocurrency space is a challenging question because any crypto project can become the best project if it has millions of dollars in funds, provided those funds are used correctly.
- So, if all of them have the potential to be good enough, bring value to the world, and be part of the crypto industry...

# HOW TO CHOOSE A PROJECT TO INVEST?

It should be based on the incentives the project offers.

Q: What do you usually get from crypto projects when you invest in them?

A: Coins or tokens that will increase or decrease in price over time, hopefully more increasing than decreasing.

But during bear markets, the price goes down, and as an investor, there is nothing to do except wait.

AND WAITING...

# THE SOLUTION

**BBACHAIN**, a Layer 1 blockchain, features a revenue-sharing program that guarantees early investors a piece of the company's profit, regardless of whether the coin's price is up or down. Powered by BTI Group OÜ, a company established in Estonia in 2021.

# IMAGINE THAT

- you invested in XXX Company when it was launched, and you received **10,000 XXX** coins, but you also received a share of the company's ecosystem profit (CEX, DEX, Mainnet transactions, etc.).
- It's 2024; you've made a lot of money from holding your coins, maybe sold a part of it, and you are waiting for the **next bull market** to see your investment grow again...
- But you don't really care if the price is going up or not. Because every month, the company is **sending USDT** to your wallet as part of the revenue sharing you **acquired** when you decided to invest in this company.

# WHAT IS THE POTENTIAL OF THIS PROGRAM?

The **BBACHAIN** ecosystem is comprehensive, encompassing various platforms and services designed to enhance user experience and utility within the blockchain and cryptocurrency landscapes.

Here's a summary of its components and their functions

## **BBA Coin:**

Acts as a governance token across all ecosystems developed on the BBACHAIN platform, playing a key role in maintaining the security and integrity of BBACHAIN. It is the exclusive method of payment for transaction fees and peer-to-peer benefits within the BBACHAIN.

## **BBA Wallet:**

A multi-chain and offline wallet that supports various blockchain networks on a single platform, allowing users to store diverse cryptocurrencies. It's available on iOS, Android, and browser extensions, offering a secure and user-friendly interface for managing crypto assets.

## **BBA Scan - Explorer:**

A blockchain explorer that provides transparent information about the blockchain system, such as account addresses, balances, transaction histories, and fees. It enhances transparency and information accessibility for users and developers.

## **Quick Token Generator :**

Enables developers to easily generate tokens on the BBACHAIN network without the need for programming expertise, offering a secure and cost-effective solution.

## **BTI Swap :**

A decentralized exchange that allows users to conduct transactions within the BBACHAIN ecosystem without intermediary organizations, ensuring safety and security.

## **BBA Pay Adapter:**

payment system that incorporates BBA into payment cards, offering safe and convenient global payment solutions. It enables BBA holders to make payments at e-commerce sites, stores, and withdraw fiat money at ATMs worldwide.

## **BTI Stablecoin – EUB:**

A digital currency developed on the BBACHAIN network with a stable value pegged to the EUR, serving as a means of payment and transaction within the BTI GROUP ecosystem.

## **BTI Prices Center:**

Aggregates cryptocurrency market information, providing detailed data on prices, market caps, trading volumes, and more, to help users track market movements and make informed decisions.

## **BTI Investment Funds:**

Supports new projects and technologies within the ecosystem, providing capital, experience, market accessibility, and strategic consulting to help startups grow and expand.

## **BTI NFT Marketplace:**

Enables users to create, collect, sell, and trade non-fungible token (NFT) properties, offering a platform for high-value creation, property valuation, and liquidity in the NFT market.

## **BTI Exchange:**

An online platform for buying and selling digital assets, offering a secure and reliable trading environment with a diverse range of currency pairs and dedicated global customer support.

This ecosystem is designed to meet the needs of today's digital industry, continuously updating and enhancing technology to remain consistent and enduring.

# REVENUE SHARING ESTIMATION

- BBACHain has 2,000 BSP (BTI Share Points) available, no less, no more.
- The company has planned to share 48% of the profits among those 2,000 BSP holders.
- The minimum amount of BSP you can hold is 1 BSP.
- Let's do some math and estimations about how much you can make once the company's ecosystem is fully operational.

# ESTIMATION PROFIT OF BBACHAIN ECOSYSTEM

Once the ecosystem is fully operational, we estimate the annual revenue of

## BTI Swap

BTI SWAP (BTI)	\$50 million - \$150 million (2025)
BTI SWAP (BTI)	\$250 million - \$500 million (2028)
BTI SWAP (BTI)	\$800 million - \$1+ Billion (2032)

# ESTIMATION PROFIT OF BBACHAIN ECOSYSTEM

Once the ecosystem is fully operational, we estimate the annual revenue of

## BTI Exchange

2026	\$2.5 million
2027	\$500 million
2028	\$700 million
2029	\$950 million
2030	\$2.5 billion
2031	\$3.5 billion
2032	\$5.5 billion

This estimation is very conservative because it doesn't consider the exponential growth of the crypto industry overall

# ESTIMATED ANNUAL PROFIT PER BSP

In this way, estimating the annual profit of the entire ecosystem in 2030 will be between US\$6 to US\$15 billion.

**And assuming you hold 1 BSP, we can calculate:**

$$\frac{48\% \text{ (US\$6,000,000,000)}}{2000 \text{ BSP}} = \text{US\$1,440,000 per year per BSP}$$

$$\frac{48\% \text{ (US\$15,000,000,000)}}{2000 \text{ BSP}} = \text{US\$3,600,000 per year per BSP}$$

**Even in the very unlikely scenario that the company's revenue would be only US\$1 billion.**

$$\frac{48\% \text{ (US\$1,000,000,000)}}{2000 \text{ BSP}} = \text{US\$240,000 per year per BSP}$$

# BSP WINS

- US\$240,000 per year per BSP in passive income for investing only \$10,000 in a BBACHAIN validator is a very good deal, isn't it?
- This is not even considering the price of the BBA coins you receive with your validator.
- It's important to remember that the Revenue Sharing will start in 2026, with the profit coming from the parts of the ecosystem that are already operating.
- If 1 BSP is not enough for you, check out the validators that give you more.

# VALIDATOR PACKAGES WITH BSP

## Medium Validator Pool

# 10,000

U S D T

INITIAL	0.4 USDT
AMOUNT	25,000 BBA
BONUS	0 BBA
SHARES	1 BSP

## Medium Validator Pool

# 30,000

U S D T

INITIAL	0.4 USDT
AMOUNT	75,000 BBA
BONUS	0 BBA
SHARES	4 BSP

## Medium Validator Pool

# 50,000

U S D T

INITIAL	0.4 USDT
AMOUNT	125,000 BBA
BONUS	0 BBA
SHARES	8 BSP

## Cloud Validator Pool

# 100,000

U S D T

INITIAL	0.4 USDT
AMOUNT	250,000 BBA
BONUS	12,500 BBA
SHARES	20 BSP

# FOR THE SMALL INVESTORS

BBACHAIN believes in the power of community.

That's why it allows investors of all sizes to join. If you don't have US\$10,000 to get the smallest validator with a BSP, you can still get involved by acquiring a validator that only includes BBA Coins.

BBA Coin is the cornerstone of our ecosystem because every transaction fee is paid with BBA.

We believe the price of our coin will increase significantly over time as our company grows and expands.

Remember, BBA Coin is not available in any exchange yet.

## Micro Validator Pool

**5,000**  
U S D T

INITIAL 0.4 USDT  
AMOUNT 12,500 BBA

# THERE IS SOMETHING ELSE

- By 2024, national elections globally continue to grapple with issues of transparency and efficiency.
- Despite the transformative potential of blockchain technology, its adoption for creating a transparent, rapid, and effective voting and election infrastructure remains largely untapped.
- This oversight presents a critical opportunity to revolutionize how democratic processes are conducted, ensuring integrity and trust in the foundations of governance.

# BBACHAIN INNOVATION

- BBACHAIN is set to apply blockchain technology to one of society's most contentious arenas: politics.
- We have embarked on in-depth research aimed at developing a fully operational and transparent Decentralized Democracy (DeDe).
- This system will enable nations to integrate their citizen databases, facilitating decentralized and transparent elections worldwide.
- Governments allocate billions of dollars to election processes, and we are confident in our ability to streamline these operations.
- By doing so, we can significantly reduce costs through minimal transaction fees, further contributing to the revenue of the company and revolutionizing the way democratic processes are conducted globally.
